AUSTRALIAN BUREAU OF STATISTICS

CATALOGUE NO. 1307.4

PREFACE

South Australian Economic Indicators is a monthly publication which contains the latest available data at the time of preparation for a range of statistical series that have been identified as indicators of economic activity in this State. In a number of cases the figures presented are preliminary and subject to revision in subsequent issues.

Written and graphic commentary have been included for many of the selected series and analysis has been augmented with the calculation of the percentage change from the previous reference period together with the presentation of comparative Australian data.

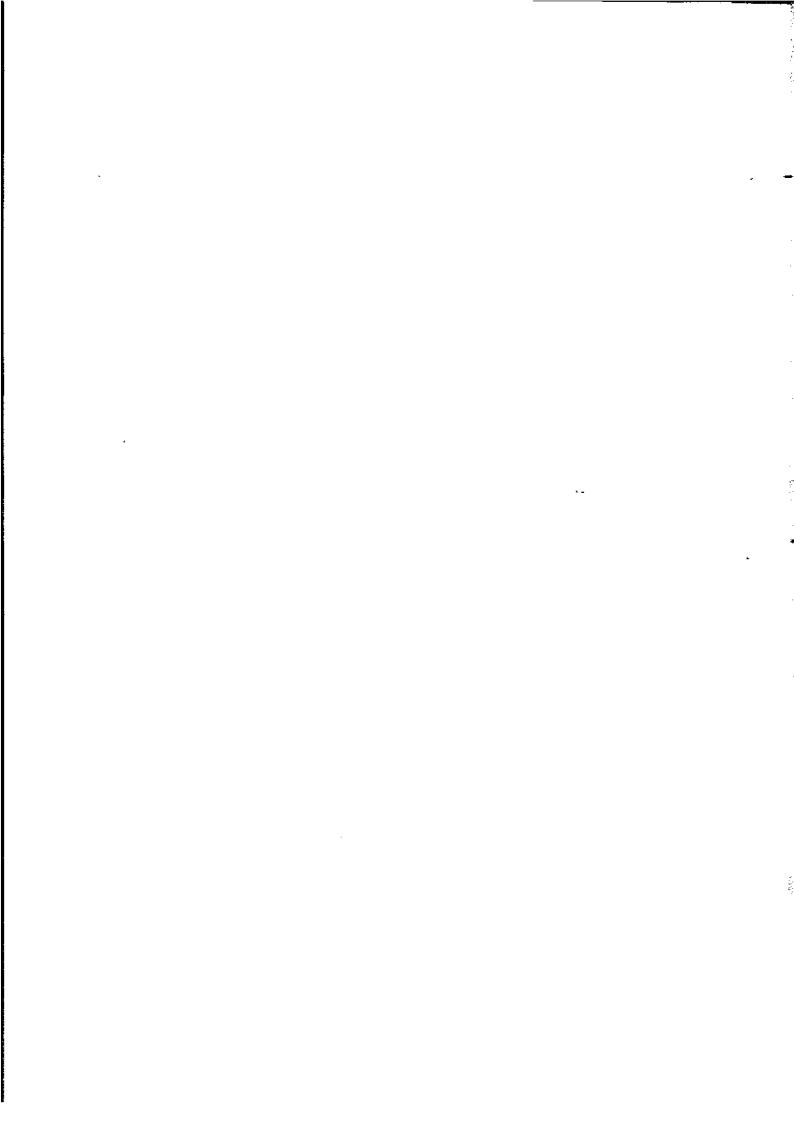

Time series information has been included to provide a historical perspective on many of the selected indicators. Future issues may be expanded to include further historical data in response to expressed user needs. This product is under continuous review and any suggestions for enhancement will be welcomed.

More detailed information on each series, including explanatory and technical notes, can be obtained from other Australian Bureau of Statistics publications or alternative data sources. To assist those seeking further information a source publication for each of the series has been documented in the statistical summary.

If you have any inquiries concerning this publication please contact the editor, John Callinan, telephone (08) 8237 7307. All requests for statistical information should be directed to the ABS Information Service, GPO Box 2272, Adelaide SA 5001, telephone (08) 8237 7100.

REVIEW

South Australian Overview

- Merchandise exports where the final stage of production was in South Australia were valued at \$405.6 million in June 1997, a 15.3% increase on June 1996. Exports for 1996-97 increased 11.4% to a record high \$5,009.5. million.
- In June 1997 the value of merchandise imports released from Customs control in South Australia were \$285.5 million, a 9.2% increase on June 1996. In 1996-97, South Australian imports were valued at \$3,415.5 million, a 9.7% increase on the previous year.
- The trend estimate for retail turnover increased by 0.3% in June 1997.
- The trend for total new vehicle registrations in June 1997 increased 0.5% and continues the growth of the last 9 months.
- The June 1997 trend estimate for total dwelling unit approvals continued to increase for the seventh consecutive month, rising by 2.3% in June.
- The total value of building approved in June 1997 was \$150.7 million of which \$49.5 million was new residential building and \$92.0 million non-residential building.
- Adelaide recorded a rise of 0.3% in the Price Index of Materials used in House Building for the month of June 1997.
- The Price Index of Materials used in Building other than House Building showed no movement in Adelaide for the month of June 1997.
- There were 4,591 short term overseas visitor arrivals to South Australia and 5,515 short term resident departures overseas in May 1997.
- After increasing in the six months to April 1997, the trend estimate of employed persons has decreased marginally over the past 3 months to number 662,000 in July 1997.
- The trend unemployment rate was 9.8% in July 1997.
- There were 1,600 working days were lost through industrial disputes in South Australia during May 1997.
- The trend estimate of average weekly ordinary time earnings of full-time adult male employees in South Australia has increased by 1.6% in the 3 months to May 1997.
- In the 12 months to June 1997, the weekly award rates of pay index for full-time employees in both South Australia and Australia increased by 1.4%.
- Total housing finance commitments (original figures including alterations and additions) decreased 5.0% to \$265.2 million.

NOTE: Deficiencies in the data sources used to estimate gross operating surplus for recent quarters may at times lead to the current price estimates of gross state product GSP(I) being under or over stated for particular States. Consequently, the measured growth rate for constant price GSP(I) for those States will also be affected.

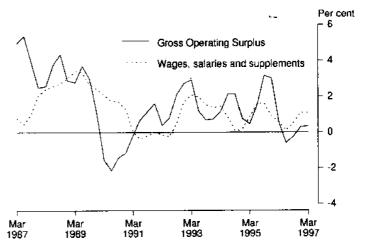

The constant price series for gross state product (GSP) have been labelled as 'experimental'. Users are cautioned that these estimates are derived indirectly by calculating a deflator from the expenditure components. It is emphasised that, at times, movements that can not be fully explained may be introduced into the constant price GSP(I) series through the use of this proxy deflator.

Trend Estimates (Current Prices)

Growth in GSP of 0.8% in the March quarter was the highest recorded since the December quarter 1995. Despite this increase, the growth of 1.3% through the year to March quarter 1997 was the lowest for any State.

Contributing to the March quarter growth was an increase of 1.1% in wages, salaries and supplements. The annual increase through to March quarter 1997 was 2.9% compared with the national increase of 6.6%.

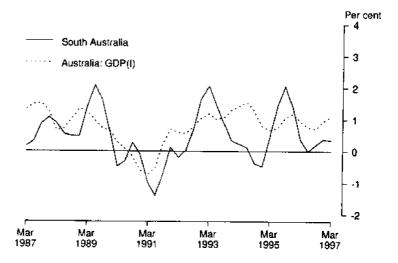

Gross operating surplus increased by 0.3% in the March quarter following similar weak growth in the December quarter 1996. A fall of 0.2% was recorded for the year to March quarter 1997.

Indirect taxes less subsidies increased by 0.7% in the March quarter, the largest increase since March quarter 1996.

Trend Estimates (Constant Prices)

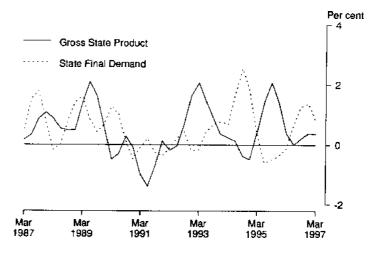

The experimental estimate of GSP at constant prices grew by 0.4% (1.1% nationally) in the March quarter and by 1.0% in the year to March 1997, considerably below the national average of 3.6%.

State final demand (SFD) increased by 0.8% in the March quarter and has, for the past four quarters, grown at a faster rate than GSP. Contributing to the growth in SFD was a 1.8% increase in private gross fixed capital expenditure which has shown the highest annual growth to March quarter 1997 (24.1%) of any State.

Private final consumption expenditure grew by 0.3% in the March quarter, the same rate as for the previous two quarters. The increase of 1.2% through the year to the March quarter 1997 was the second lowest of any State and approximately half the national average (2.3%).

International Accounts

Exports

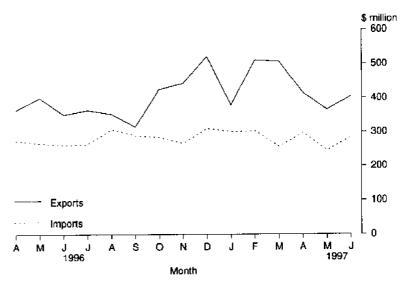

Merchandise exports where the final stage of production was in South Australia were valued at \$405.6 million in June 1997, a 10.7% increase on May and 15.3% on June 1996. Petroleum and petroleum products and road vehicles, parts and accessories were the main contributors to the increase, rising by \$22.4 million to \$37.9 million and \$16.9 million to \$56.6 million respectively.

In 1996-97 exports increased 11.4% over the previous year and were valued at \$5,009.3 million. Exports of wine, machinery, road vehicles, parts and accessories, and cereal and cereal preparations were the highest ever recorded. Road vehicles parts and accessories contributed most to the increase, rising from \$249.2 million in 1995-96 to a record high \$655.4 million. Other commodities which also contributed significantly were petroleum and petroleum products, a 30.0% increase to \$287.2 million and wine, a 24.9% increase to \$397.8 million.

The major destinations of South Australian exports in June 1997 were the United States of America with \$82.6 million and Japan with \$57.7 million. Exports to the East Asia region were \$181.1 million, an increase of 9.1% over the previous month.

During 1996-97 exports to the United States of America were valued at \$707.0 million, a large increase on the previous years value of \$279.6 million and mainly the result of increases in the export of road vehicles, parts and accessories. Japan was the the second largest destination for South Australian exports with \$612.7 million, followed by New Zealand with \$381.3 million.

MERCHANDISE EXPORTS AND IMPORTS

Imports

In June 1997 the value of merchandise imports released from Customs control in South Australia were \$285.5 million, a 16.1% increase on the previous month and a 9.2% increase on June 1996. The increase of \$39.5 million on the previous month was mainly the result of increases in the importation of road vehicles, parts and accessories, up \$18.6 million to \$54.6 million and machinery, up \$12.0 million to \$66.5 million.

In 1996-97, South Australian imports were valued at \$3,415.5 million, a 9.7% increase on the previous year. Imports of machinery was the major contributor increasing 28.5% to \$868.4 million which represented 25.4% of total imports. Imports of petroleum and petroleum products and road vehicles parts and accessories were also significant, valued at \$506.3 million and \$538.7 million respectively.

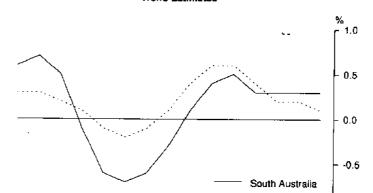

Consumption and Investment

Retail Tumover

The trend estimate for retail turnover increased by 0.3% in June 1997 and has been increasing at this rate for the past four months. The Australian trend estimate has continued to ease in recent months with growth of 0.1% for June 1997 after growth of 0.2% in April and May.

Over the three months to June 1997 the trend estimate has grown by \$7.4 million. The major contributors to this growth were hospitality and services (\$3.8 million), clothing and soft good retailing (\$2.6 million), household good retailing (\$2.5 million) and other retailing (\$2.3 million) which was partly offset by decreases in department stores (\$2.5 million) and food retailing (\$0.9 million).

In original terms, South Australian retail turnover was \$717.0 million, a decrease of 1.5% on June 1996. For the year ending June 1997 retail turnover was \$9,175.1 million, a 0.5% decrease on 1995-96. Food retailing and recreational good retailing were the only industries to show an increase, rising 8.5% and 0.5% respectively.

Australia

RETAIL TURNOVER
PERCENTAGE CHANGE FROM PREVIOUS MONTH
Trend Estimates

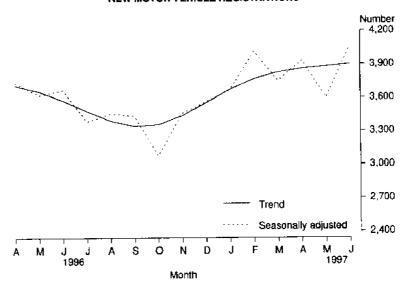

New Motor Vehicle Registrations The trend for total new vehicle registrations in June 1997 increased 0.5% and continues the growth of the last 9 months, although the rate of increase has slowed recently.

Month

In original terms there were 4,439 new motor vehicles registered in June 1997, an increase of 22.0% on May and 12.9% on June 1996. For new passenger vehicles, the leading makes registered in June 1997 were Mitsubishi (744 vehicles), Ford (700), Holden (607), Toyota (548) and Hyundai (249).

In the year 1996-97 there were 43,116 new motor vehicles registered which represented a 0.5% increase on 1995-96. Passenger vehicles showed a 0.2% increase (36,146 vehicles) whilst other vehicles increased by 2.1% (6,970 vehicles).

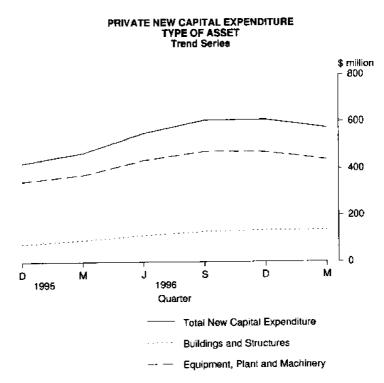

Private New Capital Expenditure The trend estimate at current prices for private new capital expenditure in South Australia for the March quarter 1997 decreased by 5.7% from the previous quarter and increased 22.9% on March 1996. The March 1997 data reversed the upward trend evident since December 1995. The Australian figure fell by 0.2%.

Private new capital expenditure in original terms for the March quarter 1997 was \$496 million, a decrease of 24.8% from the December quarter 1996. Buildings and structures accounted for \$125 million, and equipment, plant and machinery \$371 million.

Information on expected capital expenditure data is contained in the Forward Outlook on pages 18 and 19.

Tourist Accommodation

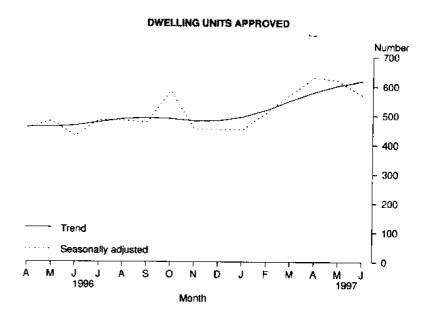

When the March quarter 1997 is compared with the March quarter 1996, the number of holiday flats, units and houses available for short-term letting increased by 7.6%. Unit nights occupied increased by 4.8% while the unit occupancy rate fell from 54.9% to 54.1%. Accommodation takings increased by 8.5% from \$4.5 million to \$4.9 million while average takings per unit night occupied rose from \$65 to \$67.

Production

Dwelling Approvals

The June 1997 trend estimate for total dwelling unit approvals continued to increase for the seventh consecutive month, rising by 2.3% in June. The total number of dwellings approved, in original terms for June 1997 was 597. Of these, private sector houses accounted for 518 and other residential dwelling units 51. For the year ended June 1997, there were 6,264 dwelling units approved, 5.0% more than the 5,968 approved the previous year.

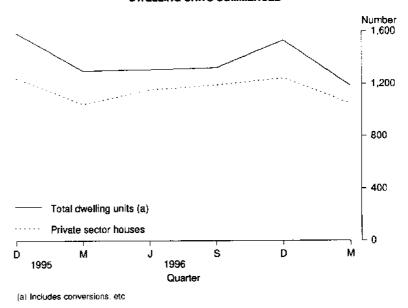

Trend growth in total dwelling units has flattened for Australia from 2.5% in January to a decrease of 0.3% in June. In original terms, South Australia accounted for 5.1% of the total dwelling units approved in Australia during June 1997. For the year ended June 1997, South Australia accounted for 4.6% of the total dwelling units approved in Australia.

Dwelling Commencements

In South Australia, the number of new dwelling units commenced fell during the March quarter 1997 to 1,178, a decrease of 23.0% on the previous quarter. This compares with a fall of 7.3% nationally. When compared with the March quarter 1996 there was a decrease of 9.0% for South Australia while the national figure increased by 2.5%. Expressed as a proportion of the national total, the number of dwelling unit commencements in South Australia was 4.0% compared with 4.8% last quarter.

Value of Building Approvals The total value of building approved in June 1997 was \$150.7 million of which \$49.5 million was new residential building and \$92.0 million non-residential building. The value of non-residential building rose by 42.2% in June 1997, with the largest categories being shops (\$35.9 million), hotels, etc (\$26.7 million) and offices (\$16.1 million).

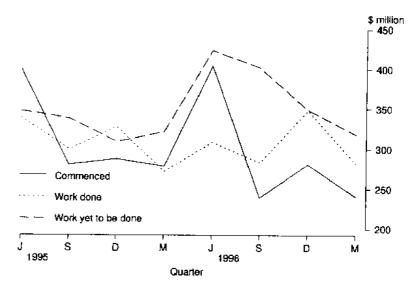

For the year ended June 1997, shops (\$106.2 million), other business premises (\$93.3 million) and offices (\$93.2 million) were 50.1% of the total value of non-residential building of \$548.5 million.

Value of Total Building Activity The total value of building work commenced in South Australia during the March quarter 1997 fell by 14.3% to \$240.7 million. This decrease can be attributed to the residential building sector which had fallen 25.7% to \$124.6 million from the previous quarter.

The total value of building work done during the March quarter 1997 decreased by 18.9% to \$282.3 million with both the residential and non-residential building sectors recording falls of more than 13.0%. Nationally the value of work done also recorded a decrease, falling 9.2% to \$6,658.3 million.

For the March quarter 1997, the total value of building work yet to be done in South Australia was \$318.1 million, a decrease of 8.8% from the previous quarter while the corresponding national figure increased by 3.5%. Expressed as a proportion of the national total, the total value of building work yet to be done in South Australia was 3.2% for the March quarter 1997 down from the previous quarter of 3.6%.

VALUE OF BUILDING ACTIVITY

Value of Engineering Construction

In March quarter 1997, the value of engineering construction work done in South Australia remained constant at \$187.6 million compared with a 14.1% fall nationally. South Australia had a 5.7% share of the national total of \$3,318.7 million. The value of work commenced during the quarter increased by 13.4% to \$240.4 million for South Australia while the corresponding national figure feel by 17.1% to \$3,114.7 million. The South Australian proportion of national commencements was 7.7% for the March quarter 1997.

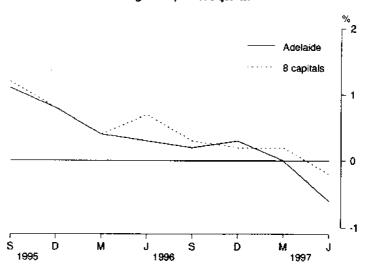

Prices

Consumer Price Index

The Consumer Price Index (all groups) in Adelaide decreased by 0.6% between the March and June quarters 1997. A fall in the index was last recorded in June quarter 1992. Contributing most to the overall decrease for the June quarter were falls in mortgage interest charges, motor vehicles and fuels.

The annual movement in the Adelaide index was (-0.1%). Adelaide and Canberra were the only cities to report a fall, with the other capitals showing increases ranging from 0.3% to 0.6%. The comparative Australian data shows a 0.2% decrease for the June quarter 1997 and an annual increase of 0.3%.

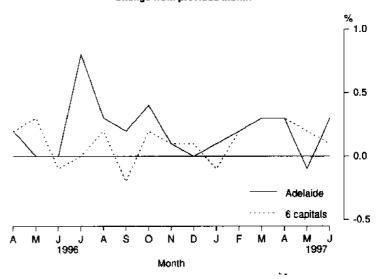

House Building Materials

Adelaide recorded a rise of 0.3% in the Price Index of Materials used in House Building for the month of June. The main factor contributing to the rise was an increase in plastic pipes and fittings. The weighted average for the six State capitals rose 0.1% for the same period.

For the twelve months to June, a rise of 3.0% was recorded in the Index for Adelaide, with only a 1.4% rise for the weighted average of the six State capitals.

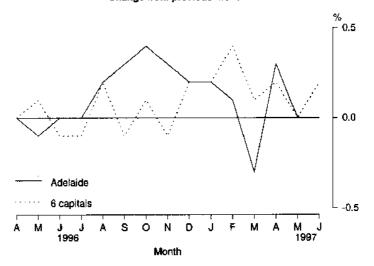

MATERIALS USED IN HOUSE BUILDING Change from previous month

Non-house Building Materials The Price Index of Materials Used in Building Other than House Building showed no movement in Adelaide for the month of June 1997. The weighted average of the six State capitals recorded a rise of 0.2% for the same period.

The Index shows a rise of 1.6% for the twelve months to June for Adelaide, with the weighted average of the six State capitals showing a 1.2% rise.

MATERIALS USED IN BUILDING OTHER THAN HOUSE BUILDING Change from previous month

House Prices

During the March quarter 1997 the Price Index of Established Houses in Adelaide increased 2.4% and the Project Home Index increased 0.4%. The weighted average of the eight capital cities index, over the same period showed a 0.9% increase for established houses and a 0.1% increase for project houses.

Over the year to the March quarter 1997 the Established House Price Index for Adelaide rose 1.5% whilst the Project Home Price Index fell by 4.8%. Nationally, the indexes showed a 2.8% increase and a 0.3% decrease respectively.

Passenger Transport Costs The passenger transport cost index measures changes in the costs of operating a public transport passenger bus service in Adelaide. Costs covered include labour costs, leasing charges, registration and insurance, repairs and maintenance, fuel and overheads. The index has been compiled on a quarterly basis from September 1995 with a base of 100.0 in 1993-94. The June quarter 1997 index was 108.0, and showed no movement between March and June 1997. The index showed a 3.6% increase in the 12 months to June 1997.

Labour Force and Demography

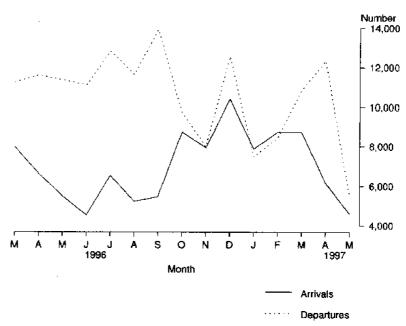

Population

At 31 December 1996 the estimated resident population of South Australia was 1,476,773. This was an increase (1,356) persons from the September quarter. The continuing low growth for South Australia is attributable to a net outflow in interstate migration of 1,427 persons which was partly offset by a net inflow of overseas migration of 1,003 persons. In the December quarter there was a natural increase of 1,780 persons.

Short term Overseas Visitor Arrivals There were 4,591 short term overseas visitor arrivals to South Australia in May 1997. This represents a fall of 25.6% on April arrivals and was 16.5% lower than May 1996. Arrivals to Australia also fell, down 11.3% from April but 10.5% above May 1996. The South Australian share of the short term overseas visitor market decreased to 1.6% in May 1997.

Short term Resident Departures In May 1997 there were 5,515 short term resident departures overseas from South Australia. This fell by 55.3% from April 1997 and 51.4% from May 1996. Australia recorded a 43.6% increase to 305,384 resident departures in May 1997, with South Australia accounting for 1.8% of the total departures.

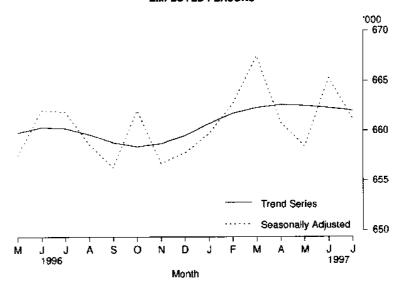

SHORT TERM OVERSEAS ARRIVALS AND DEPARTURES

Employment

After increasing in the six months to April 1997, the trend estimate of employed persons in South Australia has decreased marginally over the past 3 months and was 662,000 in July 1997. This constitutes an increase of 0.3% over the level of twelve months ago. The main contributing factor has been a 0.6% increase in full-time employment, up to 474,300 in July 1997.

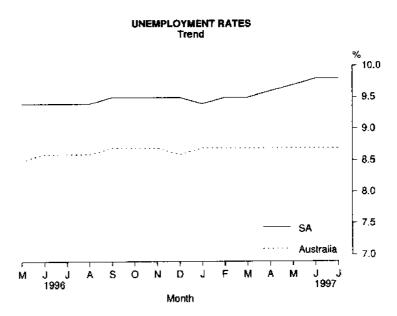

Unemployment

The trend unemployment rate for South Australia was 9.8% in July 1997, higher than the level for July 1996 (9.4%). In original terms, South Australia has also experienced a rise in long-term unemployment (i.e. unemployed for 52 weeks or more). The estimate has increased by 28.9%, from 20,100 in July 1996 to 25,900 in July 1997.

For Australia, the trend estimate of the unemployment rate has remained at 8.7% during 1997. The corresponding rate for July 1996 was 8.6%. In original terms, Australia has experienced a 14.1% increase in long-term unemployment, up from 208,860 in July 1996 to 238,240 in July 1997.

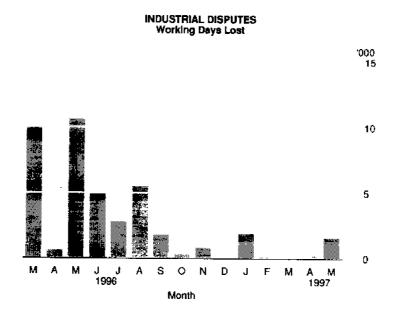

Overtime

In original terms, the proportion of employees who worked overtime in South Australia in May 1997 was 15.9%. This was lower than the May 1996 estimate of 16.1%.

In May 1997, employees who worked overtime in South Australia recorded an average of 6.8 overtime hours per week. This was higher than the 6.6 overtime hours recorded a year earlier.

Industrial Disputes

There were 1,600 working days were lost through industrial disputes in South Australia during May 1997. At only 2.4% of the national total (65,200 days), this was the lowest level recorded by any mainland State. The number of working days lost for the year ending May 1997 was 20,000, a decrease of 9,400 over the preceding 12 months.

Incomes

Average Weekly Earnings

The trend estimate of average weekly ordinary time earnings of full-time adult male employees in South Australia has increased by 1.6%; up from \$682.30 in February 1997 to \$692.90 in May 1997. For females, the corresponding increase was less pronounced at 0.9%; up from \$579.30 in February 1997 to \$584.40 in May 1997.

Between February 1997 and May 1997, the trend estimate of average weekly total earnings of all employees (including part-time workers) in South Australia rose by 1.3% to \$536.20. Over the same period, the national level increased by 0.5% to \$546.60.

Note: Since it is an average of earnings across all employees, changes in average weekly earnings may occur through changes in employment as well as changes in pay levels.

Award Rates of Pay

In the 12 months to June 1997, the weekly award rates of pay index for full-time employees in both South Australia and Australia increased by 1.4%.

For both full-time adult male and female employees in South Australia, the largest annual movement in the index occurred in Manufacturing , with increases of 2.0% and 6.8% respectively. In contrast, for the Communication industry division, both sexes recorded a nil movement in the index.

Note: This is the last month of issue of this index. It will be replaced by a wage costs index, due for release in May 1998 and covering the December 1997 quarter. Non-wage costs, for example fringe benefits tax and payroll tax, will be added in consecutive stages to produce a composite labour costs index. This indicator should be available in early 1999.

The decision to cease production of the award rates of pay index is based on various factors: the increased incidence of enterprise or workplace agreements; the gradual decline in union membership; and the growth in casual, temporary and fixed term contractual work. Award rates of pay can no longer effectively describe pay shifts for this multiplicity of working arrangements.

Financial Markets

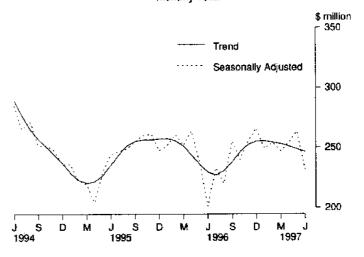

Housing Finance

The trend estimate for the value of commitments decreased to \$246.5 million in June 1997 and has been dropping since January 1997, but was still 7.3% higher than June 1996. Seasonally adjusted, the value of commitments in South Australia was \$232.1 million, down 11.9% on May.

Total housing finance commitments (original figures including alterations and additions) decreased 5.0% to \$265.2 million, 10.6% above the previous June. Nationally the decrease was 5.0% for the month, 20.0% above the previous June. The State's housing commitments continue to represent 5.8% of the national total.

Commitments for the purchase of established dwellings (the main category) were down 2.7% to \$159.5 million, 15.3% above the previous June. Construction of dwellings decreased 14.7% to \$33.9 million following the high May figure. This was 5.6% of the national total and 25.8% above June 1996, and means the past three months have been significantly above the corresponding months of the previous year. Commitments for newly erected dwellings were down 24.4% to \$7.0 million. Refinancing increased marginally to \$53.0 million, 20.7% above June last year. Alterations and additions decreased 19.8% to \$11.9 million, 54.6% below the previous June.

SECURED HOUSING FINANCE COMMITMENTS TO INDIVIDUALS (ALL LENDERS) (Excluding Alterations and Additions) Monthly Total

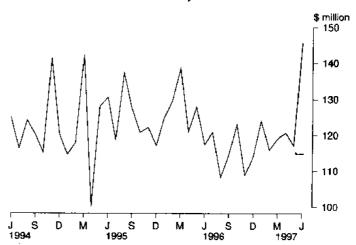

Personal Finance

Total commitments increased 9.0% to \$274.4 million in June with the big increase in fixed loan commitments only partially offset by the fall in revolving credit commitments. Nationally, total commitments rose 5.8% to be 22.0% above June 1996.

Fixed loan commitments increased 24.6% to \$145.8 million, the highest recorded figure and 24.3% above June 1996. The largest increase was for used motor vehicles and station wagons, up 30.1% to \$44.6 million, representing 8.9% of the national total and 25.3% above the previous June. Refinancing increased 58.7% to \$26.5 million, 16.9% above June 1997. The largest fall was for debt consolidation down 11.6% to \$12.9 million following the high May figure.

Revolving credit facilities decreased 4.5% to \$128.6 million, with secured credit facilities down 8.5% to \$82.9 million and unsecured revolving credit facilities increasing 3.7% to \$45.7 million. (Note: There are difficulties at present in obtaining reliable State secured commitments under revolving credit facilities).

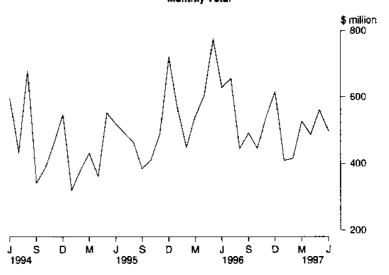

Commercial Finance

Total commercial finance commitments decreased 11.3% to \$497.9 million, 20.7% below June 1996. South Australia's proportion of the national total was 3.2%. All the past seven months have been significantly below the corresponding months of the previous year.

Revolving credit facilities decreased 37.8% to \$141.3 million, 2.0% of the national total and 22.3% below June 1996. The main decreases were for manufacturing, down \$42.1 million to \$25.0 million and mining, down \$24.7 million to \$0.3 million. The main increase was recreational, personal and other services which increased \$24.5 million to \$28.2 million.

Commitments under fixed loan facilities increased 6.7% to \$356.6 million, 4.4% of the national total and 20.0% below the previous June. The increase came mainly from the other industries category which reached \$139.0 million. The main falls were for manufacturing down 62.8% to \$16.9 million following the high May figure and property and business services down 56.6% to \$18.4 million.

COMMERCIAL FINANCE COMMITMENTS Monthly Total

Lease Finance

The value of goods under new finance lease commitments increased 47.6% to \$30.6 million, for the annual June peak. This was marginally below June 1996. Nationally the increase for the month was 40.9%, marginally above the previous June.

The main categories to increase were manufacturing equipment (up \$4.4 million to \$5.0 million), used motor cars and station wagons (up \$1.7 million to \$4.8 million) and agricultural machinery and equipment (up \$1.6 million to \$3.1 million). New motor cars and station wagons not subject to depreciation (the largest category) increased 12.7% to \$6.5 million, the third consecutive monthly increase and 1.0% above June 1996. The main fall was for office machines down 32.6% to \$1.7 million following the high May figure.

Forward Outlook

Composite Leading Indicator The Composite Leading Indicator (CLI) is a single time series produced by aggregating eight individual economic indicators, and has been developed by the ABS as an experimental series to supplement existing forms of economic analysis and modelling.

The CLI summarises the early signals contained in a selection of economic indicators and is designed to assist the detection of turning points between successive expansions and slow downs of economic activity as measured by constant price GDP(A). It does not attempt to forecast the level of economic activity.

In the March quarter 1997:

- the experimental CLI rose 0.11%, following rises of 0.23% and 0.22% in the September and December quarters respectively;
- the last turning point in the deviation from its long-term trend for average Gross Domestic Product GDP(A) was a peak in the March quarter 1996. The largest positive contribution came from the production expectations, while the largest negative contribution was from the (lagged) inverted real interest rate.

The quarterly data are released in more detail in the *Australian Economic Indicators* (Cat. no. 1350.0). The CLI was the topic of the Focus article in the September 1993 edition of *South Australian Economic Indicators* (1307.4). A review of the performance of the CLI and its components was published in the July 1997 issue of 1350.0.

Australian Business Expectations Surveys of business expectations have been available to decision makers for a number of years from several sources. These surveys provided *qualitative* indicators in the form of the net proportion of businesses expecting a rise or fall in future business conditions. Since the December quarter 1993, the ABS has been compiling a *quantitative* indicator of business expectations in the form of an expected weighted aggregate change in a range of economic variables. These data are available on a quarterly basis in *Australian Business Expectations* (Cat. no. 5250.0).

AUSTRALIAN BUSINESS EXPECTATIONS SOUTH AUSTRALIA AND AUSTRALIA SALES OF GOODS AND SERVICES EXPECTED PERCENTAGE AGGREGATE CHANGE

	Short t	em	Medium term				
	Expected aggregat	e change between	Expected aggregate change between				
Reference Period	Mar. 1997 and June 1997	June 1997 and Sep. 1997	Mar. 1997 and Mar. 1998	Sep. 97 and Sep. 98			
	%	%	%	%			
South Australia	2.8	0.0	4.0	3.4			
Australia	ıstralia 1.6 0.7		2.9	2.4			

Short term

Businesses in South Australia expect no change in sales of goods and services in the September quarter 1997 compared with the June quarter while the Australian expectation was a 0.7% increase. Nationally, sales of goods and services are expected to increase in all industries except construction (-3.2%) and retail (-0.1%).

Medium term

Businesses in South Australia expect sales of goods and services in the June quarter 1998 to be 3.4% above June quarter 1997. The Australian expectation was for 2.4% growth. The South Australian expectation of 3.4% was the second largest of all States and Territories.

Expected New Capital Expenditure State estimates of actual new capital expenditure by private businesses in Australia are compiled each quarter. Details appear on pages 7, 20 and 28 of this publication.

Each December businesses in the survey are asked for details of their longer term expectations for capital expenditure by State enabling estimates to be made for periods 6 months and 18 months ahead of the reference period. The collection of expectations in the December quarter survey also allows the derivation of a composite estimate (6 months actual plus 6 months expectations) for that financial year.

The following table shows the forward estimates made with the December 1996 collection.

EXPECTED PRIVATE NEW CAPITAL EXPENDITURE BY SELECTED INDUSTRY AND TYPE OF ASSET SOUTH AUSTRALIA

	6 months to June 1997	1996-97	1997-98
Selected industries and type of asset	\$m	\$m	\$m
Mining	140	280	228
Manufacturing	642	1 051	702
Other	502	1 240	857
Total expenditure	1 284	2 571	1 787
Buildings etc.	302	5 96	5 1 1
F:	000	4 075	1 075

Once actual expenditure for a financial year is known, it is useful to investigate the relationship between previous expectations and the expenditure that was actually incurred. The resultant realisation ratios (subsequent actual expenditure divided by expected expenditure) then indicates how much expenditure was actually incurred against the amount expected to be incurred at various times of reporting.

Realisation ratios provide an important tool in understanding and interpreting statistics for future periods. The application of realisation ratios enables the adjustment of expectation data for known under (or over) realisation patterns in the past and hence provides a valid basis for comparison with other expectation data and actual expenditure estimates.

The following table shows the average realisation ratios over the past 4 years for the composite estimate (6 months actual and 6 months expected) and the 12 month expectation from the December quarter surveys.

RATIOS OF ACTUAL PRIVATE NEW CAPITAL EXPENDITURE TO EXPECTED PRIVATE NEW CAPITAL EXPENDITURE BY SELECTED INDUSTRY AND TYPE OF ASSET - 4 YEAR AVERAGES SOUTH AUSTRALIA

ABS PUBLICATIONS AND PRODUCTS

Statistics collected by the ABS are generally made available in published form. Some, including those not published, are available in one or more of the following forms: microfiche, magnetic tape, computer printout, CD, floppy disk, photocopy and clerically extracted tabulation.

Current publications produced by the ABS are listed in the *Catalogue of Publications and Products*, *Australia* (1101.0). The ABS also issues on Tuesdays and Fridays a *Release Advice* (1105.0) which lists publications to be released within the next few days. The Catalogue and Release Advice are available from any ABS Office.

To receive ABS publications on a regular basis contact the ABS *Publication Mailing Service* on 1800 02 0608.

A large range of data is available via on-line services, diskette, magnetic tape, tape cartridge and CD ROM. For more details about our electronic data services, contact any ABS Office.

The ABS Information Consultancy Service has specialist staff to assist and advise clients

with their statistical inquiries. For more detailed information about these services call at the ABS, 55 Currie Street, Adelaide, telephone the Information Officer on (08) 8237 7100, or write to Information Service, ABS, GPO Box 2272, Adelaide SA 5001.

The ABS also provides a *Statistical Consultancy Service*, for expert assistance in survey, sample and questionnaire design, data collection, processing and analysis, and statistical modelling. For more information contact Gary Niedorfer, on (08) 8237 7379.

SYMBOLS AND OTHER USAGES

n.a. not available

n,y.a. not yet available

.. not applicable

0, 0.0 nil or rounded to zero

Where figures have been rounded, discrepancies may occur between sums of the component items and totals.

For more information . . .

The ABS publishes a wide range of statistics and other information on Australia's economic and social conditions. Details of what is available in various publications and other products can be found in the ABS Catalogue of Publications and Products available from all ABS Offices.

ABS Products and Services

Many standard products are available from ABS bookshops located in each State and Territory. In addition to these products, information tailored to the needs of clients can be obtained on a wide range of media by contacting your nearest ABS Office. The ABS also provides a Subscription Service for standard products and some tailored information services.

National Dial-a-Statistic Line

0055 86 400

Steadycom P/L: premium rate 25c/20 secs.

This number gives 24-hour access, 365 days a year, for a range of important economic statistics including the CPI.

Internet

http://www.abs.gov.au

A wide range of ABS information is available via the Internet, with basic statistics available for each State, Territory and Australia. We also have Key National Indicators, ABS product release details and other information of general interest.
